

# Residência **RP** Pediátrica

Publicação Oficial da Sociedade Brasileira de Pediatria

**PRESENTATION**

## **Presentation**

Residência Pediátrica presents the especial number on Childhood Tuberculosis in a timely manner. Recently, in Mexico, the 48th Union Meeting highlighted the theme at the opening ceremony of the event. Prof. J Starke, who did the Editorial of this Supplement, emphasized in his speech that children deserve the same care and attention as adults from the point of view of TB. As an example, in Brazil the Ministry of Health develops efforts in the training of personnel for the contact tracing and in the management of TB cases in children. Several publications and actions have been developed in this direction around the world. Our contribution to the present Supplement is a stimulus to the study of the theme.

We thank all our dedicated and valued collaborators of this Supplement from all over the world. Their collaboration and the interest of readers are invaluable in the fetch for TB elimination (End TB) in the coming decades.
