EDITORIAL

Innovation and Progress: Updates in the Journal Residência Pediátrica

Marilene Crispino[1], Clemax Sant'Anna[1], Edson Liberal[2]

It is with great enthusiasm that we announce several innovations in our periodical, designed to bring you, our regular readers, an even richer and more informative experience.

We are delighted to welcome new editors to our team. We will now have an additional Executive Editor, in addition to two Junior Editors. These highly qualified professionals will bring their valuable experience and expertise to ensure that our journal continues to be a reliable and innovative source of scientific information.

We are delighted to announce the launch of the videocast series "RP Convida", which will replace our previous podcast. In this new format, we will interview pediatricians who are leaders in their field. The interviewees will share their personal and professional life stories, as well as topics relevant to their training and clinical practice. Their experiences will surely be a source of inspiration for all of us.

This initiative will be available on the Residência Pediátrica (RP) magazine's social media channels, allowing you to stay up to date wherever you are. Share the videos with your networks!

We would like to express our deep gratitude to the Board of Directors of the Brazilian Society of Pediatrics for their continued support of the editorial board. Their encouragement and support have been essential for us to constantly progress and implement innovations. We would also like to thank the dedicated editorial board and contributors, whose tireless efforts maintain the quality of our journal and continually bring significant improvements. Without the commitment and hard work of everyone involved, we would not be able to provide valuable content to our readers.

Finally, we would like to thank you, our loyal readers, for always being with us, motivating us to seek excellence and innovation in each edition. Together we will continue to share this journey!
