Residência RP Pediátrica
Publicação Oficial da Sociedade Brasileira de Pediatria

EDITORIAL

The Pediatrics Residency podcast

A case report previously published in our Journal will be presented here. The idea is to present unusual clinical cases and provide easy access to quality medical information rigorously curated by our experts.

Case Reports reflect closely what physicians do in clinical practice. They include detailed accounts of the signs, symptoms, and peculiar patient findings, in addition to describing the procedures, treatments, and the outcomes of prescribed therapy. Readers are given insight into the factors considered in medical decision-making. Case reports are also used in the development of novel theories and often become the basis for future research.

By sharing case reports through our podcasts, we will be delivering valuable information to our listeners. Our goal is to allow you to be in constant touch with recent medical knowledge and to appreciate scientific publications that have substantially contributed to medical practice.

I should also remind you that access to the full manuscripts published in the Journal of Pediatrics Residency is free of charge. Visit us at www.residenciapediatrica.com.br. It is really easy. Please visit our website and enjoy everything the Pediatrics Residency has to offer.

Marilene Crispino
Science Editor, Journal of Pediatrics Residency.
PhD in Medicine (Clinical Research) from the Federal University of Rio de Janeiro (UFRJ).
